

WHO WE ARE

FUNDECYT-PCTEX is the Science and Technology Park of Extremadura and a public foundation with more than 25 years of experience managing and coordinating European projects in science, technology, innovation and territorial development. The organization connects public institutions, research centres, companies and civil society to promote innovation ecosystems and regional development. Through its infrastructures, incubation programmes and European project expertise, FUNDECYT-PCTEX supports the alignment of regional priorities with EU strategies, including the New European Bauhaus.

OUR TOPIC OF INTEREST IN HORIZON EUROPE

New European Bauhaus (NEB) – sustainable and inclusive territorial innovation, rural-urban connections, social innovation, entrepreneurship ecosystems, citizen participation and sustainable territorial regeneration, particularly in rural and cross-border regions.

OUR PRIORITY INTEREST IN RESEARCH COLLABORATION IN THE SELECTED TOPIC

FUNDECYT-PCTEX contributes to NEB-related projects through innovation ecosystem management, multi-level governance and stakeholder engagement. The foundation facilitates collaboration between academia, industry, public administrations and civil society using a quadruple helix approach. Expected contributions include supporting pilot initiatives, fostering social and technological innovation, strengthening rural entrepreneurship and enabling the transfer and scaling of sustainable territorial development solutions across European regions.

WHAT WE OFFER

FUNDECYT-PCTEX offers extensive expertise in European project management, innovation ecosystems and territorial development. Its Science and Technology Park hosts more than 100 technology-based companies and provides infrastructures for incubation, acceleration and knowledge transfer through initiatives such as the IRIA incubator and the IAT. The organization contributes experience in sustainability strategies, cross-border cooperation in the EUROACE region, citizen participation processes and the integration of NEB principles in multidisciplinary innovation projects.
